

Silomet

Silomet is an aqueous Chrome free metal flake coating for highest corrosion protection. It can provide corrosion protection up to 1000 Hrs when used with sealant or top coat. This technology is largely embraced by fastener industry and a variety of other applications due to its special features.

Corrosion Resistance more than 1000 hours in Salt Spray as per ASTM B117

Better than Zinc alloy plating at comparable cost.

Cure temperature at 300 °C.

Reduces frictional torque.

Chromium Free Coating.

Cathodic corrosion protection

10 to 20 microns thick coating

Environment friendly
