

SOFT JAWS

Tribology India brings to you, specially designed and manufactured Soft jaws. This unique product provides machinable surfaces for accurate component clamping. As soft jaws allows it-self to be cut, it can be used in places of fixture and simple tooling .It can also be reused several times for other components before they wear out.

Tribology India Manufactures Soft Jaws in Steel, Aluminium and Cast Iron. Straight Jaws and Pie or Round Jaws are the shapes in which Jaws are produced as per the requirements of the customers.

SOFT JAW'S COMES WITH A LIST OF ADVANTAGES

No slipping

No tool marking

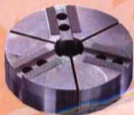

Provides gentle yet secure hold on metal plastic and wood

No crushing of metal.

SOFT JAW'S

PIE (ROUND) JAWS

A Pie Jaw is a specialized type of clamp used to hold an object, usually an object with radial symmetry, especially a cylindrical object. It is used where the jaws have to hold the entire surface of the objects mainly where high torques are involved. It is also used where the object is soft and non-ferrous in nature.

STRAIGHT JAWS

Straight jaws are usually made from a soft metal. They are used to either hold delicate workpieces or cut to hold specifically shaped objects.

Tribology India produces Soft jaws for leading power chucks such as Kitagawa, Howa, Cushman etc, and also exports it to U.S.A. Standard sizes of jaws are available for chucks ranging from 4 inches to 15 inches in diameter in various serrations or "tongue and groove" type.
